Cappuccino

**Dette trenger du:**

1 porsjon
4 cl dobbel espresso
8 cl melk

Slik gjør du:

Melkeskummet kan du lage enten ved hjelp av en steamer som finnes på espressomaskinen eller en melkeskummer. Hvis du bruker melkeskummer så skummer du melken først også varmer du den opp i mikrobølgeovn. Pass på at melken ikke koker.

Melken skal ikke være som stivpisket eggehvit, men fløyelsmyk og tett, uten store bobler. Melken er ferdig når du har 50/50 med varm melk og melkeskum.

Server gjerne med cappuccinokrydder, kanel eller kun sukker.
